Home Learning Ideas

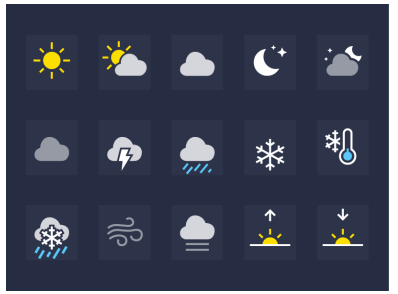
Theme: Recycling

Week Beginning: 13.2.23

Go for a walk and see how many words you can read in the environment around you. Whilst you're out and about, perhaps you could pick up any litter you see.

Help your grown-ups to sort rubbish materials from your home into the correct recycling bins. Talk to your grown-ups about where these materials end up.

Design a bird feeder out of junk modelling materials and make it. Hang it somewhere and see how many birds appear. Is your bird feeder successful? Could you make it any better?



In science, we have explored lots of different types of weather. Keep a weather diary and talk about the patterns that you notice through the week such as, when is it colder in the day?
